DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This house, facing east on the west side of Conococheague Street is a two story, three bay brick structure, painted white, which may have been built in two sections. Bricks at the first story are laid in Flemish Bond while those at the second story level display common bonding. The second story windows are topped with segmental arches of brick while those at the first story are not. The windows at both stories have two over two pane sashes. The main entrance is located at the north bay and consist of a door with a large glass pane dating from the 1920's or 30's hung beneath a four light transom which is probably original to the first story of the house. Across the entire front is an early 20th century one story porch supported by ionic columns. The chimney is located inside the south end wall.
